

Superior Clamping and Gripping

# **Product Information**

Universal gripper PGN-plus-P 160

# Reliable. Robust. Flexible. Universal gripper PGN-plus-P

Universal electric 2-finger parallel gripper with permanent lubrication, high gripping force, and high maximum moments due to the use of a multi-tooth guidance.

# **Field of application**

Pneumatic universal gripper for handling of workpieces in universal applications. For universal use in clean to slightly dirty environments. Special versions available for dirty environments.

# Advantages – Your benefits

Robust multi-tooth guidance for precise handling

High maximum moments possible suitable for using long gripper fingers

Lubricant pockets in the mult-tooth guidance ensure process reliability and extended maintenance intervals

Maximum piston surface area for maximum gripping forces

Mounting from two sides in three screw directions for universal and flexible gripper assembly

Air supply via hose-free direct connection or screw connections for universal and flexible gripper assembly

**Comprehensive sensor accessory program** for versatile querying possibilities and stroke position monitoring

Manifold options for special optimization for your specific case of application (dustproof, high-temperature, corrosion-protected, etc.)

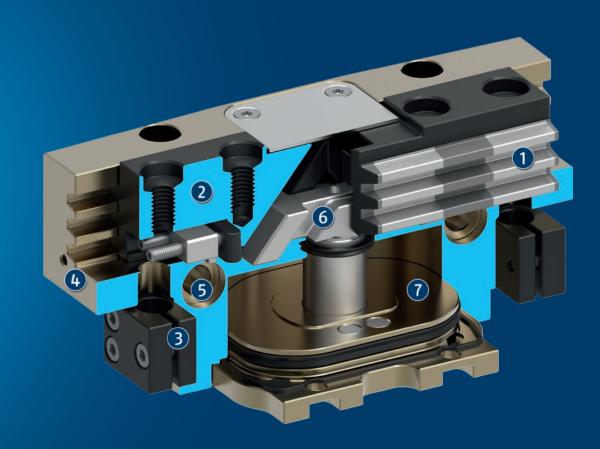

# **Functional description**

The piston is moved up and down by compressed air. The angled active surfaces of the wedge-hook produce a synchronized, parallel jaw motion.

### **①** Multi-tooth guidance

Maximum service life due to lubricant pockets in the robust multi-tooth guidance, and absorption of high forces and torques by means of the large guidance support

# ② Base Jaw

with standardized screw connection diagram for the connection of the workpiece-specific gripper fingers

# ③ Bracket for sensors

Brackets for proximity switches and adjustable control cams in the housing

# (4) Housing

is weight-optimized due to the use of high-strength aluminum alloy

- **5 Centering and mounting possibilities** for universal assembly of the gripper
- Wedge-hook design for high power transmission and minimal wear as a result of larger diagonal pull surfaces

#### ⑦ Piston

Maximum force through maximum surface of drive piston

3

# **Detailed functional description**

# **Dustproof version SD**

The "dustproof" option increases the degree of protection against penetrating substances.

This can either be ordered in a ready-mounted gripper version or else retrofitted to the gripper using the "SAD PGN-plus-P" retrofit kit.

# Gripping force maintenance version AS/IS

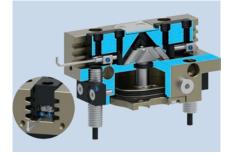

The mechanical gripping force maintenance device ensures that a minimum clamping force will be applied even if there is a drop in pressure. In the AS version this acts as a closing force, and in the IS version as an opening force. The image shows the AS version. The gripping force maintenance can also be used to increase the gripping force or for one-way gripping.

- Multi-tooth guidance
- Base Jaw
- Bracket for sensors
- 4 Housing

- Centering and mounting possibilities
- 6 Wedge-hook design
- Piston
- **8** Gripping force maintenance device

# Settings of the control cams during monitoring with inductive proximity switches

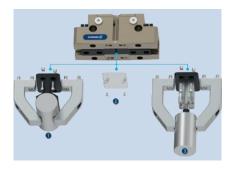

Monitoring with inductive proximity switch can be performed as standard from size 64. In delivery state, the positions "gripper open" and "gripper closed" are preset with the control cams. The inductive sensors must be ordered separately and are slid into the housing up to the stop and clamped.

In order to monitor any other position, such as "workpiece gripped" for example, both control cams can be individually set in the respective base jaws.

- Control cam preset for "gripper closed" position
- Control cam preset for "gripper open" position
- Holder with clamping screw for fixing the sensor
- Clamping screw for process-reliable fixing of the adjusted switching point
- Adjusting screw for setting any switching point

# Optional mounting possibility under the cover sheet for customer-specific additional structure

In delivery state, a cover sheet is mounted to the gripper. This can be removed if necessary. Under the cover sheet are threads and fittings for mounting customer-specific designs for implementing additional functions.

- Additional centering or support of the workpiece
- 2 The cover plate (can be removed)
- Ejector with external cylinder attached to the gripper

# General notes about the series

**Operating principle:** Wedge gear with surface power transmission

Housing material: Aluminum

Base jaw material: Steel

Actuation: pneumatic, with filtered compressed air as per ISO 8573-1:2010 [7:4:4].

Warranty: 36 months

**Longlife:** 30 years functional warranty (details can be found online)

**Scope of delivery:** Brackets for proximity switches, centering sleeves, O-rings for direct connection, assembly instructions (operating manual with declaration of incorporation is available online)

**Gripping force maintenance device:** possible by using the version with mechanical gripping force maintenance or pressure maintenance valve SDV-P

**Gripping force:** is the arithmetic sum of the individual force applied to each jaw at distance P (see illustration).

**Finger length:** is measured from the reference surface as the distance P in direction to the main axis. The maximum permissible finger length applies until the nominal operating pressure is achieved. With higher pressures, the finger length must be reduced proportionally to the nominal operating pressure.

**Repeat accuracy:** is defined as a distribution of the end Position for 100 consecutive strokes.

**Workpiece weight:** is calculated for force-fit gripping with a coefficient of static friction of 0.1 and a safety factor of 2 against workpiece slippage at acceleration due to gravity g. For form-fit or capture gripping, there are significantly higher permissible workpiece weights.

**Closing and opening times:** are purely the times that the base jaws or fingers are in motion. Valve switching times, hose fill times, or PLC reaction times are not included, and are to be considered when cycle times are calculated.

# **Application example**

Handling tool for loading and unloading raw and finished parts and compensation of inaccurate position. A sensor distributor is used for routing signals through a cable.

- Sensor distributor V4
- **2** Tolerance compensation unit TCU-Z
- Universal gripper PGN-plus-P
- IN sensors
- **9** Universal rotary actuator SRM

# SCHUNK offers more ...

The following components make the product PGNplus-P even more productive – the suitable addition for the highest functionality, flexibility, reliability, and controlled production.

Tor more information on these products can be found on the following product pages or at schunk.com. Please contact us: SCHUNK technical hotline +49-7133-103-2696

# **Options and special information**

**Gripping force maintenance version AS/IS:** The mechanical gripping force maintenance version ensures minimum gripping force even in the event of a pressure drop. In the AS/S version this acts as a closing force, in the IS version as an opening force.

High-temperature version V/HT: for use in hot environments

Precision version P: for the highest accuracy

Anti-corrosion version K: for use in corrosion-inducing atmospheres

ATEX version EX: for explosive environments

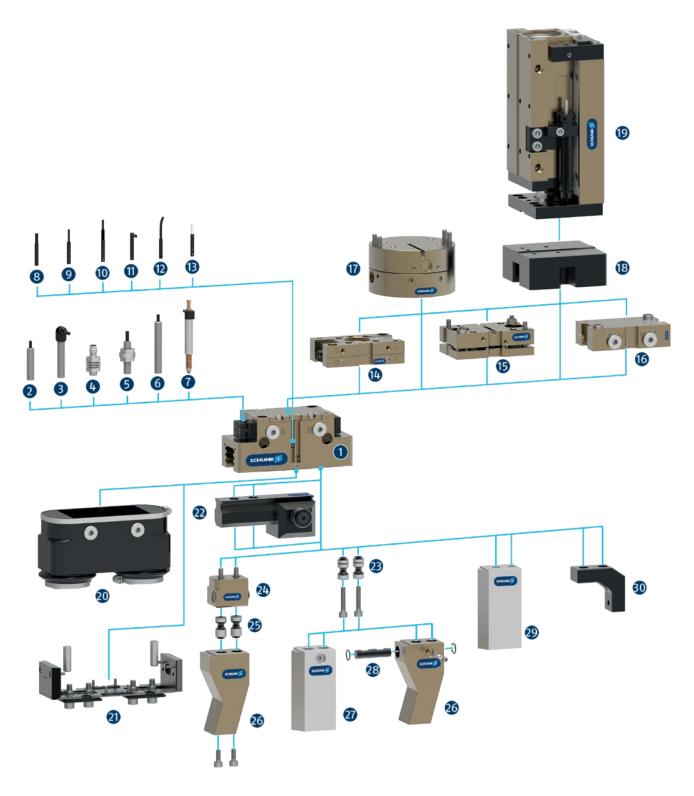

Dustproof version SD: absolutely dustproof, increased degree of protection against ingress of materials.

Additional versions: Various options can be combined with each other.

Integrated air purge connection: impedes the ingress of dirt into the inside of the gripper

# SCHUNK gripper PGN-plus-P

# **Overview Accessories**

Universal 2-finger parallel gripper with a high gripping force and high maximum moments due to the use of a multi-tooth guidance

#### Sensor system

#### 2 IN ...

Inductive proximity switch with molded cable and straight cable outlet

#### 3 IN ...-SA

Inductive proximity switch with molded cable and laberal cable outlet

### IN-C 80

Inductive proximity switch, directly pluggable

#### 6 FPS

Flexible position sensor for monitoring up to five different, freely selectable positions

#### 6 APS-Z80

Inductive position sensor for precise position detection of the gripper jaws with analog output

#### APS-M1S

Mechanical measuring system for precise position detaction of the gripper jaw with analog output

#### 8 MMS 22

Magnetic switch with straight cable outlet for monitoring a position

#### MMS 22-PI1

Magnetic switch with straight cable outlet for monitoring a freely programmable position

#### 9 MMS 22-PI2

Magnetic switch with straight cable outlet for monitoring two freely programmable position

#### MMS 22-PI1-HD

MMS 22-PI1 in robust design

# MMS 22-PI2-HD

MMS 22-PI2 in robust design

#### MMS 22-SA

Magnetic switch with lateral cable outlet for monitoring a position

#### MMS 22-PI1-SA

Magnetic switch with side cable outlet for monitoring a freely programmable position

#### MMS-P

Magnetic switch with straight cable outlet for monitoring two freely programmable position

#### B MMS-A

Analog magnetic switch with straight cable outlet for measuring the gripper jaw position with analog output and teach function

#### **Complementary products**

### 🚯 CWS

Manual change system with integrated air feed-through for simple exchange of the handling components

## 🚯 TCU

Tolerance compensation unit for compensating small tolerances in the plane

#### **(5)** SDV-P-E-P

Pressure maintenance valve for temporary force and position maintenance

#### AGE

Compensation unit for compensation of large tolerances along the X and Y axes

#### 18 ASG

Adapter plate for combining various automation components in the modular system

#### CLM

Linear module with pneumatic drive and scope-free pre-loaded junction rollers

#### 20 HUE

Sleeve for protection against dirt

#### 

Dustproof version, retrofit kit

### Fingerzubehör

### UZB

The universal intermediate jaw allows fast tool-free and reliable plugging and shifting of top jaws at the gripper.

#### BSWS-AR

Adapter coupling of jaw quick-change system for fast, manual change of top jaws

#### 2 BSWS-B

Locking mechanism of the jaw quick-change system for fast, manual exchange of top jaws

#### BSWS-A

Adapter coupling of the jaw quick-change system for adaptation to the customized finger

#### Customized fingers

#### BSWS-ABR

Finger blank made of aluminum with interface to the jaw quick-change system

#### BSWS-SBR

Finger blank made of steel with interface to the jaw quick-change system

### BSWS-UR

Locking mechanism for the integration of the jaw quickchange system into customized fingers

#### ABR/SBR

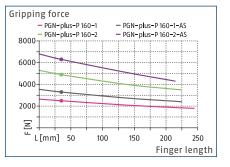

Finger blanks made of steel or aluminum with standardized screw connection diagram

#### 🕄 ZBA

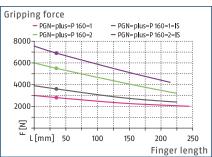

Intermediate jaws for reorientation of the mounting surface

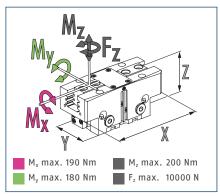

# Gripping force 0.D. gripping

### Gripping force I.D. gripping

### **Dimensions and maximum loads**

The indicated moments and forces are statical values, apply for each base jaw and should not appear simultaneously. Loads may additionally occur to the moment produced by the gripping force itself.

 $\oplus$  It may take a few 100 gripping cycles until the full gripping force (as indicated in the data table) will be available.

Universal gripper

### Main view

The drawing shows the gripper in the basic version with closed jaws, without dimensional consideration of the options described below.

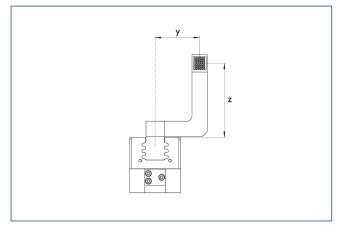

- The SDV-P pressure maintenance valve can also be used for I.D. or O.D. gripping alternatively or in addition to the spring-loaded, mechanical gripping force maintenance device (see catalog section on accessories).
- A, a Main / direct connection, gripper opening
- B, b Main / direct connection, gripper closing
- S Air purge connection
- $\bigcirc$  1 Gripper connection
- (2) Finger connection
- (72) Fit for centering sleeves
- 80 Depth of the centering sleeve hole in the counter part
- 90 Sensor MMS 22..
- (91) Sensor IN ...
- Screw connection with centering for customized mounting (these centering sleeves are not included in the scope of delivery)

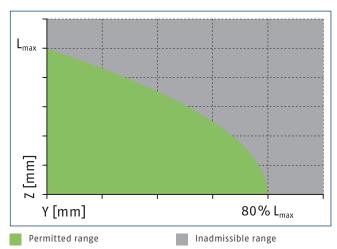

SCHUNK

Universal gripper

# Maximum permitted finger projection

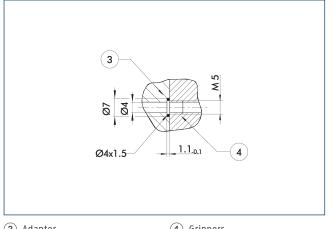

Hose-free direct connection M5

 $L^{max}$  is equivalent to the maximum permitted finger length, see the technical data table.

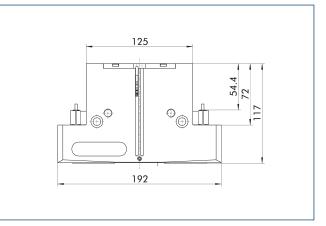

### Gripping force maintenance device AS / IS

(3) Adapter

(4) Grippers

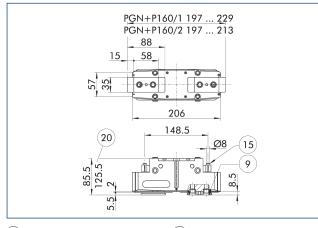

The direct connection is used for supplying compressed air without hoses. Instead, the pressure medium is fed through bore-holes in the mounting plate.

The mechanical gripping force maintenance device ensures that a minimum clamping force will be applied even if there is a drop in pressure. This acts as closing force in the AS / S version, and as opening force in the IS version. Besides this, the gripping force maintenance device can be used to increase the gripping force or for single actuated gripping.

Universal gripper

### **Dustproof version**

(9) For mounting screw connection diagram, see basic version

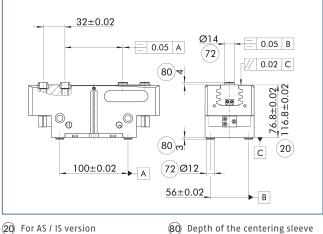

Sealing bolt
For AS / IS version

The "dustproof" option increases the degree of protection against penetrating substances. The assembly diagram shifts by the height of the intermediate jaw. The finger length is still measured from the upper edge of the gripper housing.

| Characterization ID        |
|----------------------------|
| Dust cover                 |
| SAD PGN-plus-P 160 1347575 |

The "dustproof" option can either be ordered as a pre-mounted gripper version or can be retrofitted to the gripper using the "SAD PGN-plus-P" retrofit kit.

### **Precision version**

(20) For AS / IS version(72) Fit for centering sleeves

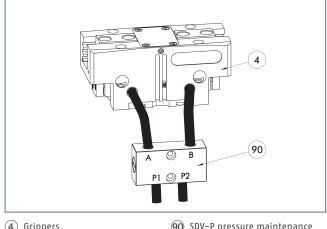

80 Depth of the centering sleeve hole in the counter part

The indicated tolerances just refer to the variants of precision versions shown in the chart of technical specifications. All other variants of precision versions are available on request.

3

Universal gripper

# SDV-P pressure maintenance valve

(4) Grippers

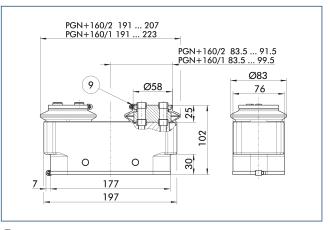

(90) SDV-P pressure maintenance valve

The SDV-P pressure maintenance valve ensures in emergency STOP situations that the pressure in the piston chamber of pneumatic gripper, swivel, linear, and quick-change modules is temporarily maintained.

| Characterization                                | ID      | Recommended hose diameter |  |
|---|---------|---------------------------|--|
|   |         | [mm]                      |  |
| Pressure maintenance valve                      |         |                           |  |
| SDV-P 07  | 0403131 | 8                         |  |
| Pressure maintenance valve with air bleed screw |         |                           |  |
| SDV-P 07-E                                      | 0300121 | 8                         |  |
| SDV-P 10-E                                      | 0300109 | 10                        |  |

① In order to achieve the specified closing and opening time for each gripper variant, the recommended hose diameter must be used. The direct allocation of the respective variant of the gripper for the respective SDV-P can be found at schunk.com.

# Protective cover HUE PGN-plus 160

(9) For mounting screw connection diagram, see basic version

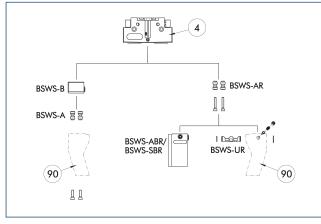

The HUE protective cover fully protects the gripper against external influences. The cover is suitable for applications of up to IP65 if an additional sealing of the cover bottom is provided. For detailed information, please see the HUE series. The connection diagram shifts by the height of the intermediate jaw.

| Characterization | ID      | IP protection class |
|------------------|---------|---------------------|
| Protection cover |         |                     |
| HUE PGN-plus 160 | 0371484 | 65                  |

① The HUE protective cover is not suitable for use on grippers with gripping force maintenance. An inductive monitoring of the gripper in connection with the HUE protective cover is not possible. SCHUNK recommends the use of magnetic sensors that are approved for the respective gripper variant.

Universal gripper

### BSWS jaw quick-change jaw systems

#### (4) Grippers

(90) Customized gripper fingers

There are various jaw quick-change systems available for the gripper. For detailed information, please refer to the corresponding product.

| Characterization                          | ID      | Scope of delivery |  |  |  |
|---|---------|-------------------|--|--|--|

| Jaw quick-change system locking mechanism |         |                   |  |  |  |
| BSWS-UR 160                               | 0302995 | 1                 |  |  |  |

① Only systems that are listed in the table, can be used.

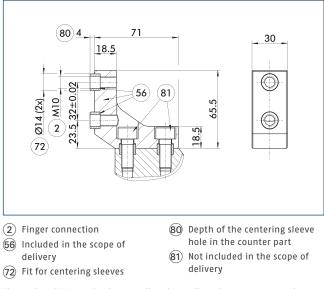

#### **Fields of application**

| Series     | Size                                       | Variant                  | Suitability |  |
|------------|--|--------------------------|-------------|--|
| PGN-plus-P | 160  | -1 (6 bar)               |             |  |
| PGN-plus-P | 160  | –1–AS / –1–IS (6<br>bar) |             |  |
| PGN-plus-P | 160  | -2 (6 bar)               |             |  |
| PGN-plus-P | 160  | -2-AS / -2-IS (6<br>bar) |             |  |
| Legend     |  |                          |             |  |
|            | Can be combined without restrictions       |                          |             |  |
|            | Use with restrictions (see loading limits) |                          |             |  |
| 0000       | cannot be combine                          | d                        |             |  |

The load limits for describing the application limits can be found in the catalog chapter of the corresponding accessories.

If the operating pressure is higher than 6 bar, suitability for use above the application limits must be checked.

### ZBA-L-plus 160 intermediate jaws

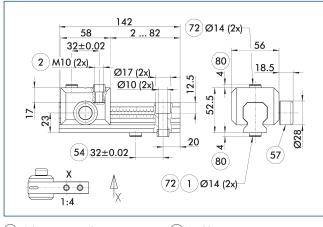

The optional ZBA-L-plus intermediate jaws allow the screw connection diagram of the top jaws to be rotated by 90°. This makes it easier to design and produce top jaws (particularly for long versions) because no deep through-bores are required.

| Characterization | ID      | Material | Finger<br>interface | Scope of<br>delivery |
|------------------|---------|----------|---------------------|----------------------|
| Intermediate jaw |         |          |                     |                      |

#### **Fields of application**

| Series     | Size                                       | Variant                  | Suitability |  |
|------------|--|--------------------------|-------------|--|
| PGN-plus-P | 160  | -1 (6 bar)               |             |  |
| PGN-plus-P | 160  | –1–AS / –1–IS (6<br>bar) |             |  |
| PGN-plus-P | 160  | -2 (6 bar)               |             |  |
| PGN-plus-P | 160  | -2-AS / -2-IS (6<br>bar) |             |  |
| Legend     |  |                          |             |  |
|            | Can be combined without restrictions       |                          |             |  |
|            | Use with restrictions (see loading limits) |                          |             |  |
|            | cannot be combine                          | d                        |             |  |

The load limits for describing the application limits can be found in the catalog chapter of the corresponding accessories.

If the operating pressure is higher than 6 bar, suitability for use above the application limits must be checked.

### Finger blanks ABR- / SBR-PGZN-plus 160

2 Finger connection

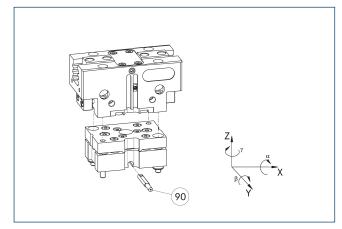

(72) Fit for centering sleeves

The drawing shows the finger blank which can be reworked by the customer.

| Characterization  | ID      | Material | Scope of delivery |
|-------------------|---------|----------|-------------------|
| Finger blank      |         |          |                   |
| ABR-PGZN-plus 160 | 0300014 | Aluminum | 1                 |
| SBR-PGZN-plus 160 | 0300024 | Steel    | 1                 |

Universal gripper

#### **Tolerance compensation unit TCU**

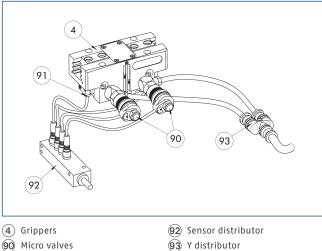

(90) Monitoring of locking

Grippers can be directly mounted without an adapter plate. Tolerance compensation unit and gripper have an identical screw connection diagram. Therefore the tolerance compensation units can be assembled later. Please consider the additional assembly height of the tolerance compensation unit. For details please refer to our catalog robot accessories.

| Characterization  | ID      | Locking | Deflection    | Often<br>combined |
|-------------------|---------|---------|---------------|-------------------|
| Compensation unit |         |         |               |                   |
| TCU-P-160-3-MV    | 0324846 | yes     | ±1°/±2°/±1,5° | •                 |
| TCU-P-160-3-0V    | 0324847 | no      | ±1°/±2°/±1,5° |                   |

#### **Attachment valves**

(91) Sensor

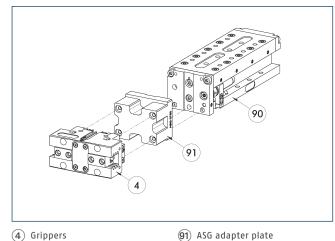

(93) Y distributor

The set of attachment valves reduces the compressed air consumption as there is no need to ventilate or bleed the supply lines. This can also reduce cycle time. The hose-free direct assembly of the micro valves reduces the hosing effort for the gripper. To further simplify electrical connection of the valves and sensors, their signals can be bundled via an optional distributor.

| Characterization    | ID      | Often combined |
|---------------------|---------|----------------|
| Attachment valve    |         |                |
| ABV-MV30-G1/8       | 0303328 |                |
| ABV-MV30-G1/8-V2-M8 | 0303396 |                |
| ABV-MV30-G1/8-V4-M8 | 0303366 | •              |
| ABV-MV30-G1/8-V8-M8 | 0303367 |                |

① A set of attachment valves ABV is required per actuator. The ABV set contains two 3/2 micro valves, an Y-distributor for compressed air supply and optionally a sensor distributor with two, four or eight inputs or outputs. Sensors for monitoring the gripper need to be ordered separately. Pneumatic hoses are not included in the scope of delivery.

### **Modular Assembly Automation**

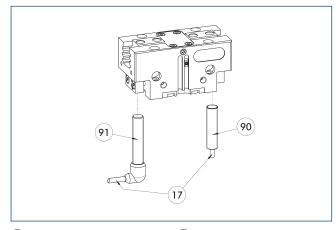

- (4) Grippers
- (90) CLM/KLM/LM/ELP/ELM/ELS/HLM linear modules

Grippers and linear modules can be combined with standard adapter plates from the modular assembly system. For more information see our main catalog "Modular Assembly Automation".

① Two sensors are required per unit for monitoring two positions. On option, extension cables and sensor distributors are available. Additional product variants of the sensor, and further information and technical data can be found in the catalog chapter sensor system.

Universal gripper

### Programmable magnetic switch MMS 22-PI1

17) Cable outlet

(91) Sensor MMS 22 ..- PI1-...-SA

(90) Sensor MMS 22 PI1-...

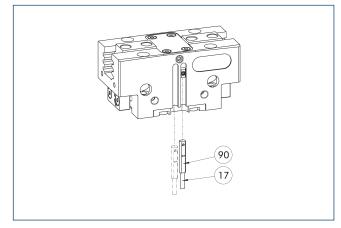

Position monitoring with one programmable position per sensor and integrated electronic system in the sensor. Can be programmed using MT magnetic teaching tool (included in the scope of delivery) or ST plug teaching tool (optional). End position monitoring for mounting in the

C-slot. If the ST plug teaching tools are listed in the table provided, teaching is only possible with the ST teaching tools.

| Characterization  | ID   | Often combined |  |  |  |  |

| KA BW08-L 4P-1000    | 0307766 |                |
| Sensor distributor   |         |                |
| V2-M8-4P-2XM8-3P     | 0301380 |                |

One sensor is required per unit for monitoring two positions.
Extension cables and sensor distributors are optionally available.
Additional product variants of the sensor, and further information and technical data can be found in the catalog chapter sensor systems.

# MMS-A analog position sensor

(74) Limit stop for sensor

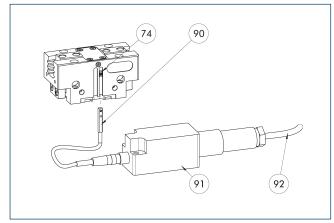

No-contact measuring, analog multi-position monitoring for any number of positions.

| Characterization       | ID      |
|------------------------|---------|
| Analog position sensor |         |
| MMS 22-A-10V-M08       | 0315825 |
| MMS 22-A-10V-M12       | 0315828 |

① One sensor is required for each gripper. No additional mounting kit is required - the gripper is equipped for use of the sensor by default. Further information and technical data can be found in the catalog chapter sensor systems.

Universal gripper

### Flexible position sensor with MMS-A

(74) Limit stop for sensor

(91) FPS-F5 evaluation electronic

(92) Connection cables

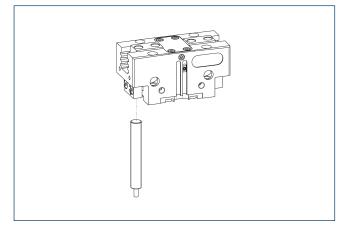

(90) MMS 22-A-... sensor

Flexible position monitoring of up to five positions.

| Characterization       | ID      |
|------------------------|---------|
| Analog position sensor |         |
| MMS 22-A-05V-M08       | 0315805 |
| Evaluation electronics |         |
| FPS-F5                 | 0301805 |
| Connection cables      |         |
| KA BG16-L 12P-1000     | 0301801 |

① When using an FPS system, one MMS 22-A-05V and one electronic processor (FPS-F5) are required per each gripper, as well as a mounting kit (AS), if listed. Cable extensions (KV) are optionally available - see catalog chapter "Accessories."

## APS-Z80 analog position sensor

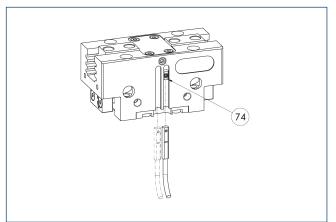

No-contact measuring, analog multi-position monitoring for any number of positions.

| Characterization            | ID      | Often combined |
|-----------------------------|---------|----------------|
| Mounting kit for APS-Z80    |         |                |
| AS-APS-Z80-PGN-plus-P 160-1 | 1374181 |                |
| AS-APS-Z80-PGN-plus-P 160-2 | 1374182 |                |
| Analog position sensor      |         |                |
| APS-Z80-K                   | 0302072 |                |
| APS-Z80-M8                  | 0302070 | •              |

() When using an APS system, one mounting kit (AS-APS-Z80) and one APS-Z80 sensor is required per gripper. The resolution of the sensor can be lower in the peripheral areas of the gripper. You can find further information on the product in the operating manual.

### Programmable magnetic switch MMS-IO-Link

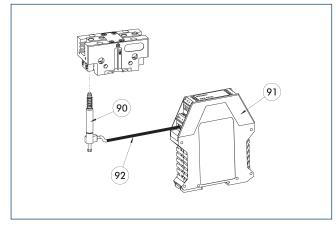

#### (74) Limit stop for sensor

Sensor for multi-position monitoring through detection of the complete gripper stroke. The sensor is mounted directly in the C-slot of the gripper. Sensor programming on the gripper takes place via the IO-Link interface or the MT magnetic teach tool (included in scope of delivery). An IO-Link master is required for operation.

| Characterization | ID           |
|------------------|--------------|
| Programmable mag | netic switch |
| MMS 22-10L-M08   | 0315830      |
| MMS 22-I0L-M12   | 0315835      |

① One sensor is required for each gripper. No additional mounting kit is required - the gripper is equipped for use of the sensor by default. Further information and technical data can be found in the catalog chapter sensor systems.

# APS-M1 analog position sensor

90 APS-M1S sensor

(92) APS-K extension cable

(91) APS-M1E electronic processor

Analog multi position monitoring for any desired positions

| Characterization           | ID      |  |
|----------------------------|---------|--|
| Mounting kit for APS-M1    |         |  |
| AS-APS-M1-PGN-plus-P 160-1 | 1374144 |  |
| AS-APS-M1-PGN-plus-P 160-2 | 1374159 |  |
| Analog position sensor     |         |  |
| APS-M1S                    | 0302062 |  |

When using an APS system, for each gripper an attachment kit (AS-APS-M1), an APS-M1S sensor (incl. 3 m cable) as well as an electronics (APS-M1e) are required. An extension cable (APS-K) can be connected between the sensor and the electronics as an option. The max. cable length between the sensor and the electronics is 10 m, between the electronics and their control unit (PLC) it is max. 1 m.
